

1. Multiple Linear Regression

Tuesday, June 30, 2026 9:30 PM

⇒ 3D

$$y = mx_1 + nx_2 + b \rightarrow \beta_0$$

$$y = \beta_0 + \beta_1 x_1 + \beta_2 x_2$$

⇒ for ND:-

$$y = \beta_0 + \beta_1 x_1 + \beta_2 x_2 + \dots + \beta_n x_n$$

$$y = \beta_0 + \sum_{i=1}^n \beta_i x_i$$
